<https://san3222.github.io/My-Portfolio/>

Mumbai, India

SUMMARY

Software Engineer with experience building scalable web applications, internal business systems, automation workflows, REST APIs, and data dashboards. Proficient in JavaScript, Node.js, React.js, Python, SQL, and cloud-based tools, with hands-on experience integrating WhatsApp, email, and third-party APIs. Strong background in delivering solutions for Sales, HR, Accounts, Operations, CRM, Procurement, and Administration teams.

EXPERIENCE

Software Developer

Puneet urban Spaces

01/2024 – Present

Mumbai, India

Puneet Urban Spaces is a Mumbai-based real estate developer focused on delivering modern residential and commercial projects. In my role as a Software Developer, I design, build, deploy, and maintain internal web applications and automation solutions that support multiple business functions.

- Developed and maintained internal web applications, automation systems, and real-time dashboards for Sales, HR, Procurement, Accounts, Administration, Operations, Store, Billing, IT, CRM, and delegation management teams.
- Built scalable dashboards and reporting systems using JavaScript, Node.js, React.js, Express.js, HTML, CSS, Bootstrap, Power BI, Looker Studio, and Google Sheets.
- Designed and integrated REST APIs, WhatsApp automation, email workflows, and notification systems using Meta API, MSG91, Google Apps Script, and other third-party services.
- Implemented cloud-based solutions using Google Cloud Platform, BigQuery, MongoDB, MySQL, and Kafka for data processing, storage, and analytics, while strengthening authentication, authorization, and data security.
- Created automation tools that reduced manual work, improved operational efficiency, and streamlined business processes across departments.
- Managed database operations, query optimization, and reporting systems using SQL, MongoDB, Excel, and Google Sheets.
- Developed AI-enabled solutions and business dashboards for sales tracking, employee management, procurement monitoring, and operational reporting.
- Collaborated with cross-functional teams to gather requirements, deploy solutions, and provide ongoing technical support for internal platforms.

Tools: JavaScript, Node.js, React.js, Express.js, Google Apps Script, GCP, Kafka, MongoDB, MySQL, SQL, BigQuery, Power BI, Looker Studio, Meta API, MSG91, HTML, CSS, Bootstrap, Excel, Google Sheets, AI tools

Software Engineer

Xcriptech Pvt. Ltd.

05/2022 – 08/2023

Noida, India

Xcriptech is a technology and management consulting startup delivering innovative solutions for fast-paced client projects. As a Software Engineer, I contributed to the development, deployment, and maintenance of web applications and backend services.

- Designed and implemented server-side logic, APIs, and backend services for web applications.
- Built automated solutions and web interfaces using JavaScript, Node.js, HTML, CSS, and related web technologies.
- Developed and documented APIs that delivered data and functionality to client applications, improving communication between frontend and backend systems.
- Worked with MongoDB and MySQL to design schemas, write queries, manage data migration, and maintain data integrity.
- Implemented user authentication, authorization, and security controls to protect sensitive data and prevent unauthorized access.
- Wrote clean, maintainable code and applied debugging and error-handling techniques to resolve production issues efficiently.
- Supported deployment of Node.js applications by configuring environments, managing release processes, and setting up monitoring and logging.

Tools: JavaScript, Node.js, Express.js, Python, Django, MongoDB, MySQL, AWS, Git, GitHub, React.js, Bootstrap

Associate Executive

ChannelPlay

10/2019 – 03/2020

Gurugram, India

Channelplay is a retail and distribution solutions company offering technology-enabled services and digital loyalty programs. In this role, I supported customer operations, CRM workflows, reporting, and data management activities.

- Assisted customers in a courteous and professional manner, resolving inquiries and providing accurate information in a timely way.
- Verified retailer invoice data in the CRM system and ensured customer records were accurately captured and stored in the database.
- Maintained effective communication with customers through phone, chat, and email to improve service quality and customer experience.
- Created and maintained scheduled SQL Server jobs for database space management and daily backup operations.
- Built BigQuery and Data Studio reports to present operational insights to relevant departments.
- Supported optimization of a multi-terabyte data warehouse by improving query performance through indexing and partitioning strategies.
- Prepared CRM and dashboard reports for review by senior management and higher authorities.

Tools: CRM, Advanced Excel, SQL, JavaScript, BigQuery, Looker Studio, Microsoft Office, Power BI

Python Developer Intern

IIHT

06/2018 – 09/2018

Mumbai, India

IIHT is a training organization focused on advanced technologies, software, security, and IT infrastructure. During my internship, I worked on Python-based development tasks and database-driven applications.

- Developed a Python wrapper for use in a multi-threaded application.
- Wrote MySQL queries and used Python MySQL Connector to retrieve and process application data.
- Collaborated with cross-functional teams to design and implement RESTful APIs that improved data exchange between frontend and backend systems.

Tools: Python, Django, NumPy, Pandas, MySQL, HTML, CSS, C, Data Structures

EDUCATION

B.Tech in Information Technology
Dr. A.P.J Abdul Kalam Technical University

2015 - 2019 Lucknow, UP

GPA
6.9 / 10

12th
SSYI College

2013 - 2015 Azamgarh, UP

GPA
7.2 / 10

10th
SGBI College

2012 - 2013 Azamgarh, UP

GPA
7.6 / 10

SKILLS

Frontend

JavaScript, React.js, HTML, CSS, Bootstrap

Backend, Data & Tools

Node.js, Express.js, Python, Django, MySQL, MongoDB, BigQuery, Power BI, Looker Studio, Google Apps Script, Pandas, NumPy, Kafka, GCP, AWS, Git, GitHub

App-Script	AWS	MongoDB	Big-Query	MS-Office	Git
------------	-----	---------	-----------	-----------	-----

TRAINING / COURSES

Android-Controlled Robotics and Python Technology

Internet of Things (IoT) internship and workshop experience completed through IIHT and CyberCure Technologies.

Covered core concepts in sensor integration, Python application development, debugging, data handling, and third-party API integration.

- Worked on sensor integration and data streaming concepts.
- Practiced writing, testing, and debugging Python code for application workflows.
- Used Python libraries for data handling and analysis with database-connected applications.
- Integrated Python applications with third-party APIs and services to extend functionality.
